

# Metalworking's Choice...

## for Shear Satisfaction

Discover the difference IKS shear blades can make in your production shearing operation. You'll get optimum performance and extended blade life resulting in more tons per edge. You'll also get higher productivity as machine downtime for blade changes is significantly reduced.

### **Superior Quality**

IKS shear blades are manufactured from the finest alloys to close tolerance quality control standards. They are available in many material grades to suit individual shearing applications and are precisely heat treated to assure consistent uniform hardness. Two special IKS material grades have made Mark I and Mark II shear blades popular worldwide.

### **IMMEDIATE AVAILABILITY**

IKS shear blades are available in a complete range of sizes for both domestic and foreign made shears. Shipment is made from the world's largest inventory of standard sizes... prompt delivery of the blades whenever you need it. In addition, special shear blades are custom manufactured to specifications in the shortest turnaround time.

### **START SAVING TODAY**

Put our technical expertise and total service capability to work for you. For application and pricing details contact:

### **Mark II**

A modified high carbon, high chrome alloy tool steel grade providing maximum cuts before dulling when shearing mild steel and including 1" thick. Also applicable for stainless steel up to and including 1/2" thick.

### **Mark I**

A high quality shear blade material-Premium high carbon, high chrome tool steel. Gives maximum life before dulling on mechanical shears cutting mild steel up to and including 1/4" thick. Also for hydraulic shears up to and including 3/8" mild steel capacity.

### **Performance Matched**

As your authorized International Knife & Saw distributor, we can help you select the right blade for your needs. Experienced product specialists match blade design, alloy and hardness to your specific requirements. We'll study your application and recommend the right blade for maximum performance.
