

International  
Knife & Saw

*Introduces a  
**REVOLUTION**  
In Safety and  
Productivity!*

# The IKS Grinding System

- Log saw blade usage is reduced
- Productivity Gain / Produce more cases per shift
- Lower operational costs / Less maintenance
- More consistent cut quality
- Enhanced employee safety

# The IKS Log Saw Grinding System

## INCREASED PRODUCTIVITY

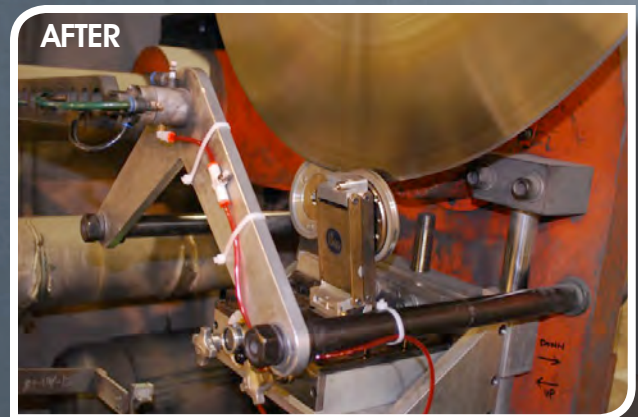

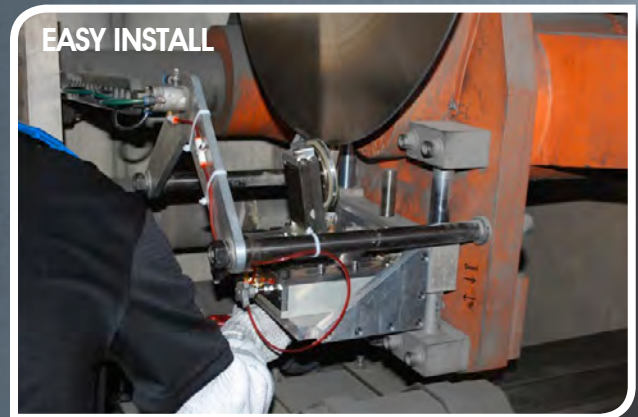

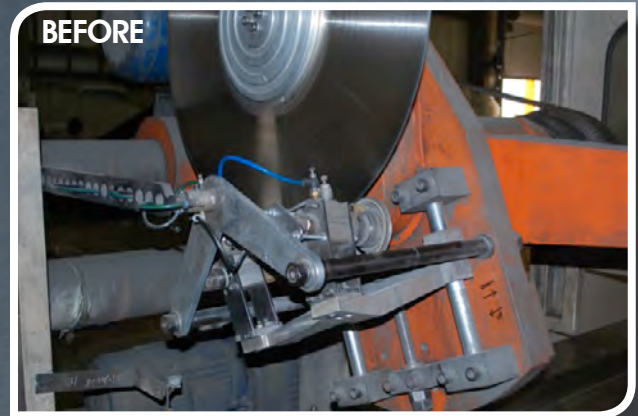

- Nominal log saw machine downtime due to reduced operator set up time of the IKS grinding system\*
- Minimal operator adjustments required on grinding system for ease of operation – Operator friendly!
- Precision pre-set grinding wheel angles consistently deliver:
- Increased blade life
- Blades get sharp quickly, stay sharper longer, resulting in less blade changes
- Improved cut quality
- Less chance of blade scalloping as a result of innovative floating grinding wheel system design
- Grinding wheel pressure is preset, reducing unnecessary and sometimes harmful operator adjustments

## LOWER SYSTEM COST

- The initial cost of the IKS grinding system can be up to 40% lower than the average OEM grinding system
- Professional installation performed by IKS factory trained technical engineers
- Minimal log saw machine downtime required to install the IKS grinding system\*
- Substantial reduction in annual maintenance cost to maintain the IKS grinding system due to quick release cartridge style grinding heads— A true plug and play concept
- Energy savings – reduced air and electrical usage with the IKS grinding system\*
- Grinding wheel savings due to dual face wheel design

## SAFETY

- Enhanced safety for the operator
- Less exposure time to the razor sharp edge of blade when operator is in the saw box
- Operator time and frequency in the saw box is significantly reduced.

## International Knife and Saw, Florence, SC

The International Knife and Saw manufacturing facility in Florence, South Carolina produces the world's finest industrial knife blades supported by one of the industries most comprehensive inventories.
